Dwelling Condition	Number of Dwellings	% of All Dwellings
Major repairs needed	50	15.90%
Minor repairs needed	265	84.10%

Housing affordability

Shelter cost-to-income ratio (STIR) is used as a measure of housing affordability. Housing is considered unaffordable if the household spends 30% or more of total household income on shelter cost.

Shelter costs for owner households include, where applicable, mortgage payments, property taxes and condominium fees, along with the costs of electricity, heat, water and other municipal services. For renter households, shelter costs include, where applicable, the rent and the costs of electricity, heat, water and other municipal services.

In Beiseker, 16.4% of all private households have STIR greater than 30%.

The charts below represent the percentage of households that spend 30% or more of their household income on shelter cost.

Shelter cost-to-income ratio

Percentage of households with STIR = 30% or more

■ STIR ≥ 30%

Date source: Statistics Canada, Census 2021
